Product Highlights

All Logs on a central server

TrustSafe Audit Trail log detected events either on a log central Domino server, which allows you to centrally store all of your TSAT logs

Document deletions

The TrustSafe Audit Trail log will show whether or not the document was a "soft" or "hard" deletion

Domino Directory & TrustSafe Audit Trail Database ACL Monitor

Shows complete ACL entries in addition to the changed entries

Enhanced statistics and reports

TrustSafe Audit Trail provides meaningful statistic and log summary reports on confidential mail of each server and all servers

Server Settings view

A Server Settings view allows you to monitor all TrustSafe Audit Trail enabled servers at a glance

Intrusion Detection Monitor

Logs and monitors occurrences of malicious events – illegal access to databases, illegal database creation, illegal server access, database deletion, access without authorized public key and more
